

Opportunity for Trainee Development Engineer

Backdrop

We are a Product Engineering Group, that has led large scale transformation engagements with clients in Healthcare domain. Over a glorious journey of more than a decade, we have partnered with a plethora of healthcare leaders to understand & address their unique needs & challenges with Our Products & Professional Engineering Services.

Our engagements have created big impact & go much beyond delivering stand-alone technology solutions. We are proud to have developed long-standing strategic partnership with a distinguished client base.

Today, we have travelled a journey packed with growth, learning and opportunities - which in turn empowered us to become a strong team of over 400 multi-disciplinary engineers spread across our work locations in Reston (USA), Gurugram (India) and Indore (India).

Our Products & Services are designed to be incredibly adaptable to industry-wide strategies & requirements, and serve heterogenous needs of healthcare enterprises across the board. This has put us in a great spot to take our offerings to wider market.

Overview Of The Role

As a Trainee Development Engineer at AVIZVA, you will act as the master of writing well-designed, testable and efficient code. You will take charge of the software development lifecycle and will be a self-starter at documenting & maintaining software functionality. You will develop high-quality and low-latency applications that comply with coding standards & technical design.

Start@AVIZVA With A Guided Training Programme

To help you kickstart a smooth and guided career journey, we have thoughtfully crafted an 8-10 week dedicated Training Programme. The programme will not just introduce you to the organisational standards & processes, but it will also walk you through the fundamentals of our technology practices. It will further include a Pseudo Project where you will experience & practice the complete product development approach followed at AVIZVA. Post a successful completion of the training programme, you will join forces with our team to get started on the LIVE projects.

What Will Make You A Perfect Fit

- Excellent analytical and problem solving skills
- Positive and enthusiastic approach to learn and adapt to new methodologies
- Articulate and confident communicator with excellent prioritisation skills
- Ability to take ownership of tasks and drive things to fruition
- Ability to comprehend with clarity and come up with innovative ideas

Qualifications

- Bachelor's Degree(B.Tech) in Computer Science or Information Technologies.
- Sound knowledge of Programming, Data Structure and OOPS concept.
- Experience across college projects and internships in technologies such as Java, C++, Python or Javascript
